

Teachable Moments

Early Learning Center

The goal of our Preschool and Pre-Kindergarten program is to introduce a variety of activities that will develop fundamental skills necessary for a positive learning experience.

We will develop your child's cognitive skills thru sorting and sequencing. Develop motor skills thru jumping, catching and other large gross motor activities. Creativity in arts and crafts promotes spontaneity in a learning environment.

These goals are achieved with age appropriate materials and a well thought out program that has proven successful for 20 years.

We attempt to focus on a central theme. Your child will be enriched daily with stories, games and activities which are created around that central theme. Reading and phonetics are part of the daily schedule.
